Notice: A hard copy of this document may not be the document currently in effect. The current version is always the version on the Lockheed Martin network.

- A. Seller shall implement and maintain a Software Quality Assurance ("SQA") program acceptable to Buyer for engineering design, development, testing and delivery of stand alone or embedded software products associated with this purchase order ("PO").
- B. Seller shall implement, and comply with a Software Quality Program Plan ("SQPP"), organized and documented in Seller format, which defines Seller's software quality program to Buyer. Seller's SQPP is subject to Buyer approval or disapproval. Buyer reserves the right to

2. The non-deliverable software is placed under internal configuration control prior to its use and such internal configuration control is maintained throughout its use.
- E. Buyer's software quality representatives shall have the right to conduct in-process inspection of Seller's software development process defined in the SQPP and evaluate Seller's compliance with its internal procedures and other applicable documents at Seller's facilities.
