

THAAD is designed to intercept threats both inside and outside the atmosphere in addition to providing significant mass raid capability. THAAD is combat proven and uses Hit-to-Kill technology to enable its lethal aim-point accuracy against short, medium and intermediate-range ballistic missiles.

Ability to intercept missiles inside and outside the atmosphere

Defends population centers and high value infrastructures

Interoperable with other ballistic missile defense systems

Highly mobile and deployable worldwide

## Milestones

Expanding production facilities to meet global demand
