DELIVERING STREAMLINED SUSTAINMENT SOLUTIONS

LOCKHEED MARTIN

A web based electronic "library" of aircraft support documentation and illustrations. The application provides rapid access to principles of operation manuals, testing and troubleshooting procedures, maintenance procedures, illustrated parts breakdown manuals, and various supporting documentation.

Ø Hyperlinked, hierarchical TOC (table of contents)
Ø Linked access to all incorporated source data and content
Ø Intelligent schematics and IPDs
Ø Deficiency reporting utility
Ø Execute Mode & Audit Logging for Maintenance Sessions

Ø Provides rapid access to content
Ø Supports display of numerous graphic formats and multimedia
Ø Modern GUI that is easy to use, and touch-friendly

Ø United States Navy
Ø United States Marine Corp
Ø United States Airforce
Ø Lockheed Martin Mission Systems & Training Publications Group
Ø International Military customers
The graphics shown here are representative of IETMs in different programs

The requirements listed below apply to the HH60W Integrated Support System software application, Version 4.0.

Hardware requirements (spoke e-tool)

       CPU @ 1.90GHz

       Integrated Graphics Processing Unit (GPU)

       LCD sunlight-readable LED display with touchscreen capabilities

       8GB DDR3 RAM

       Solid State 128GB HDD

       10/100/1000 base-T Ethernet

       Dual Band Wireless Adapter (802.11ac)

       I/O Interfaces: DC in x 1, USB x 1

       AC Adapter

Software Requirements

       Windows 10 Operating System

       SQL Server 2014 or newer (express edition is acceptable)
